Product name: Pyruvate Kinase I (pykF)

Cat #: PKI-100, PKI-200, PKI-OEM

Description:

Pyruvate kinase is an enzyme involved in glycolysis. It catalyzes the transfer of a phosphate group from phosphoenolpyruvate (PEP) to ADP, yielding one molecule of pyruvate and one molecule of ATP. ELISA and western blot analysis assure its specificity and reactivity. However, since the application varies, each investigation should be titrated by the reagent to obtain optimal results. Recommended dilution range for western blot analysis is 1:250 ~ 1000. Recommended starting dilution is 1:250.

Protocol:

Recommended dilution range for western blot analysis is $1:250 \sim 1000$. Recommended starting dilution is 1:250.
